Mr. Ray Haas  
2265 Balsam Lane, R. R. 1  
Eagle River, Wisconsin 54521

Dear Mr. Haas:

I received the results of our sampling trip of May 31, 1983, and no fecal contamination was indicated in your lake.

All samples contained 10 or less than 10 fecal coliform and fecal streptococcus organisms per 100 ml of sample. To put this in perspective, public swimming beaches must have less than 250 fecal coliforms per 100 ml of sample, and raw sewage typically has over 500,000 fecal coliforms per 100 ml.

Thanks again for bringing this to my attention and for the use of your boat in sampling. If you have any more questions or concerns about this matter, please call.

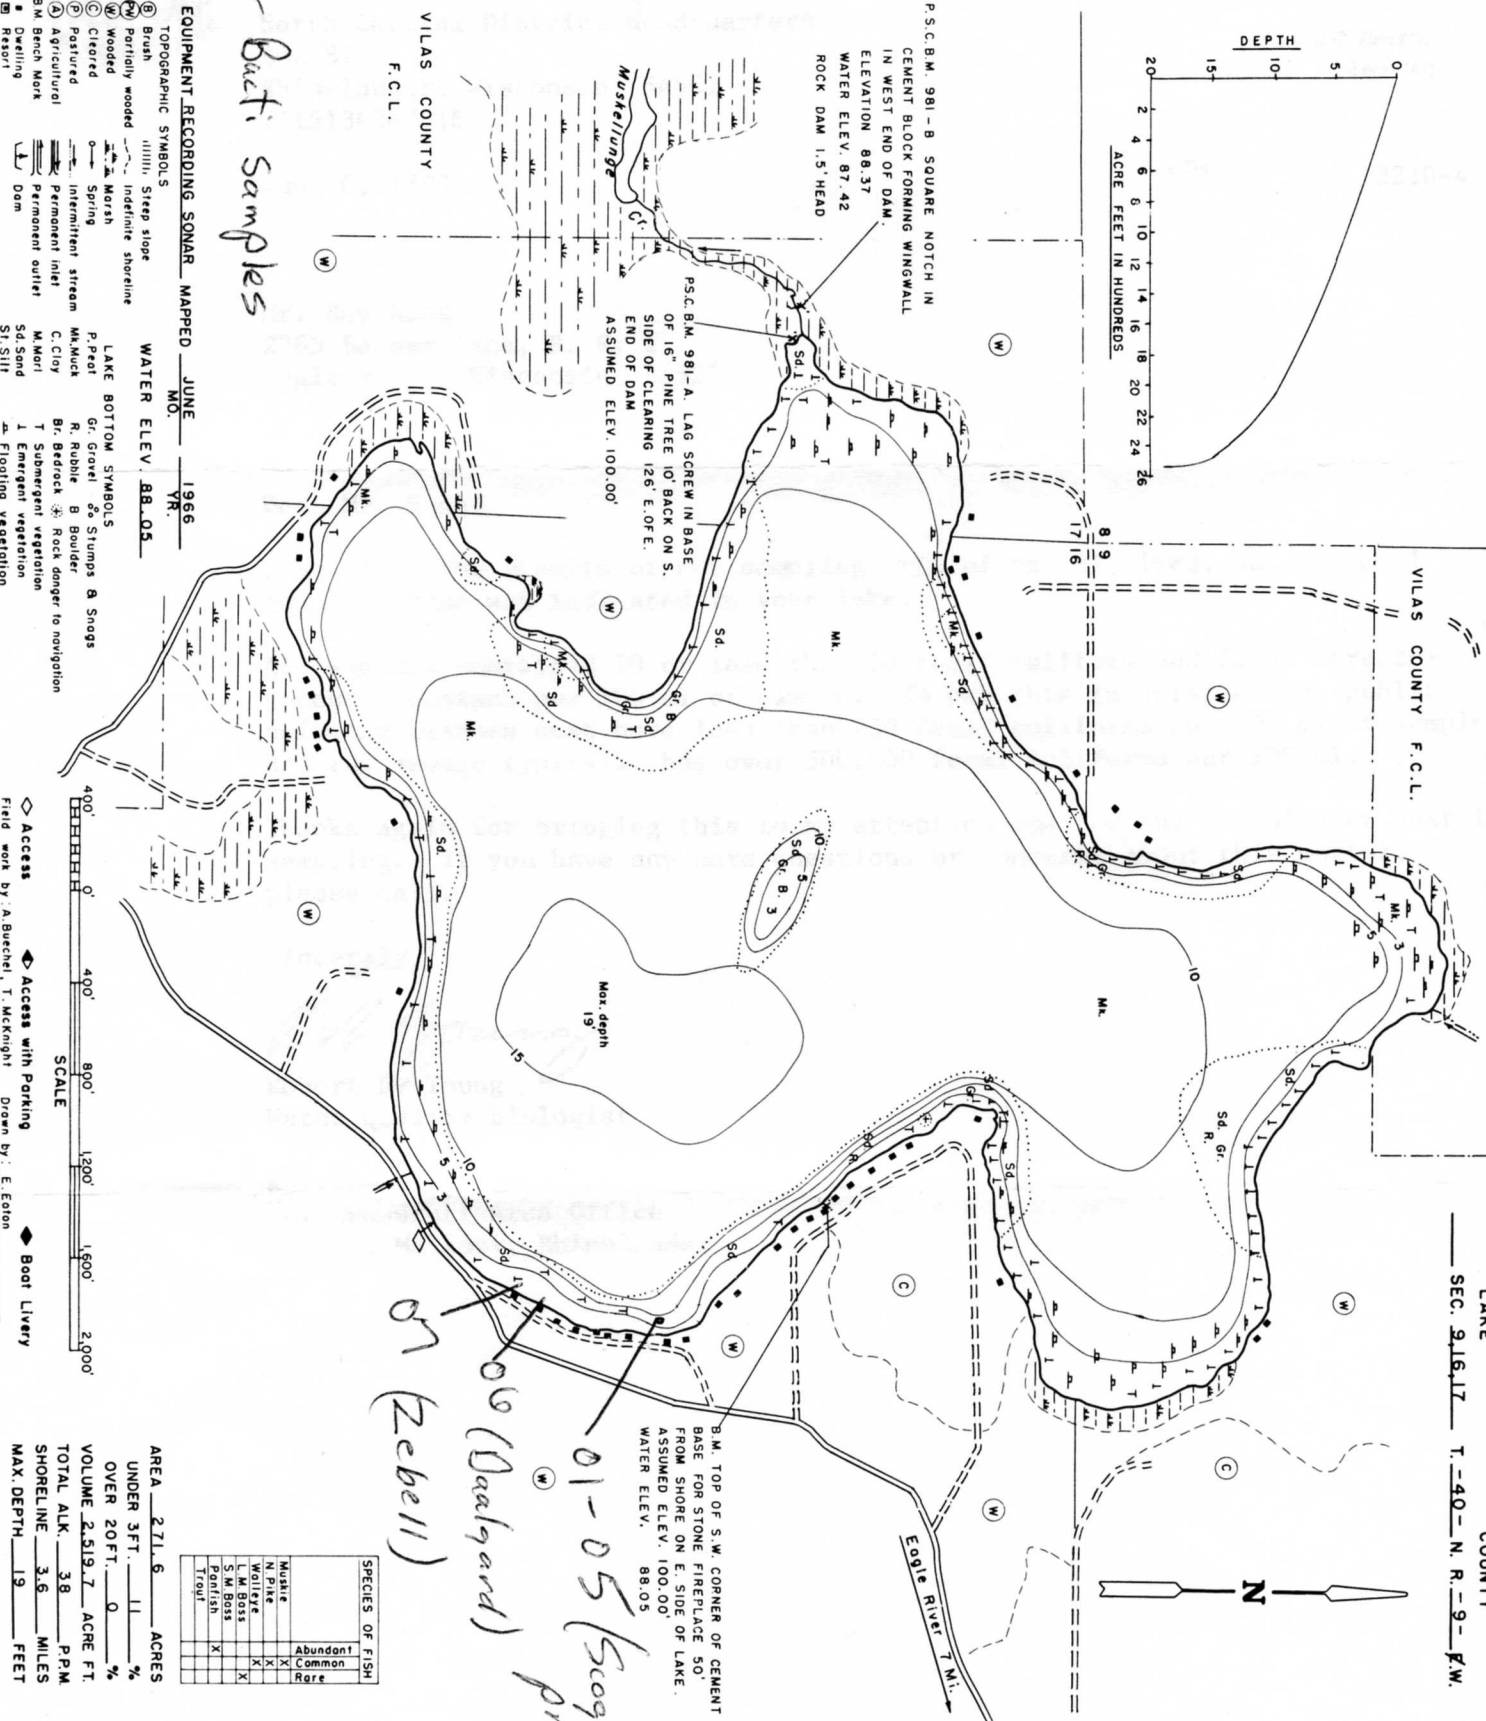

Sincerely,

A handwritten signature in cursive script that reads 'Bob Young'.
